Shaping Innovative Solutions

## About Us

Longwood Elastomers is a leading manufacturer of rubber and rubber bonded products for diverse applications in the Automotive, Industrial and Consumer sectors.

Established in 1989, Longwood Elastomers is a subsidiary of Longwood Industries, a privately held company headquartered in Greensboro, NC, USA.

Companies around the globe look to Longwood for our specialized knowledge and technological expertise in the design and manufacture of rubber products. Longwood currently operates 4 production facilities with over 400 employees and 1 global R&D centre.

## Longwood Europe

Our plant in Soria, Spain has been a reliable partner to the European market for high quality compounds and components, fast development cycles and implementation into series production. Our broad production capabilities and advanced bonding technologies offer the right solution for your project — whether it's developing new parts or optimizing an existing design.

Our product offerings include an extensive range of custom-molded parts such as precision seal rings, rubber-to-metal, rubber-to-plastic and rubber fabric components.

We are a key supplier to the European automotive industry, certified to ISO-14001 and TS 16949 and are awarded a preferred supplier rating with most of our customers. Our customer base includes leading OEMs as well as Tier 1 suppliers and axle integrators.

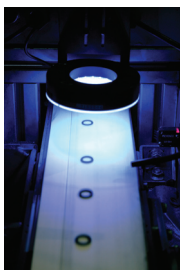

## Stabilizer Bar Bushings

Longwood is a leading European supplier for stabilizer bar bushings. We work closely with our customers to engineer dimensions and materials. We determine best compounds and designs meeting working temperature, comfort and stiffness requirements. Our range includes rubber, rubber-self-lubricating, rubber/PTFE, rubber-to-metal, rubber-to-plastic as well as rubber/metal-plastic bushings.

## Precision Seals

Longwood Spain produces +100Mio precision seals per year, all 100% inspected by state-of-the-art camera machines. Applications are automotive such as throttle valve control units and steering columns as well as white goods, appliances and FMCG. Combining high performance compounds and advanced production capabilities results in high precision and consistent quality. Compounds include: EPDM, NR, NBR, FKM, Vamac, Silicone and others.

# Suspension and Ride Control

Longwood supplies a wide range of ride control elements including shock absorber mount bushings, spring pads, dampening elements and bellows to leading tier 1 suppliers. We support our customers to engineer dimensions and materials to absorb vibration and provide safe and tight handling characteristics.
